

FOR IMMEDIATE RELEASE

VJ Electronix to Demo Next Generation Technologies at APEX

January 2017 — VJ Electronix, Inc., the leader in rework technologies and global provider of advanced X-ray inspection and component counting systems, will exhibit in Booth #915 at the 2017 IPC APEX EXPO, scheduled to take place Feb. 14-16, 2016 at the San Diego Convention Center. The company will demonstrate new material handling automation for XQuik II with AccuCount Technology, along with the new and improved model Summit 1800i.

The revolutionary XQuik II with AccuCount Technology is now faster than ever. With available material handling automation, the XQuik system automatically counts components at up to twice the original speed. Parallel processing allows the system to acquire images and calculate component count in parallel with bar code scan, loading and labeling of reels.

The new Summit 1800i is an improved version of the world's most popular rework system. VJE has maintained the the benefits of high efficiency convection heating and the renowned 1-2-3-Go interface, coupled with updated technology for greater reliability and an improved price point. Further refinements enhance the system's performance with ultra small components like 01005s, while maintaining its capabilities with large boards, oversized CPU sockets, connectors and large BGAs.

Also on display, the popular Micra is designed for rework of smaller, high performance components, such as Chip Scale Packages (CSP), Package on Package (PoP) and Micro Passives (01005). The enhanced Micra provides a larger 35 mm alignment field of view, expanding its range of applications into more automotive, medical and military/aerospace products.

###

About VJ Electronix

VJ Electronix, Inc. manufactures production ready, automated Rework and X-ray inspection systems with many advanced capabilities. The company frequently provides custom solutions tailored to satisfy specific application requirements. VJ Electronix is a worldwide leader in X-ray Inspection and Rework equipment.
