

FOR IMMEDIATE RELEASE

VJ Electronix Will Demonstrate How to Manage Component Reel Inventory in Just Seconds at productronica

October 2015 — VJ Electronix, Inc., the leader in rework technologies and global provider of advanced X-ray inspection systems, will exhibit in Hall A3 Booth 112/6 at the productronica International Trade Fair, scheduled to take place Nov. 10-13, 2015 at the Messe München exhibition center in Munich, Germany. VJ Electronix will highlight the new high performance Summit II and XQuik II with AccuCount for counting components stored in reels.

The new Summit II is the latest semi-automated rework system. Improved ergonomics combined with next-generation controls and proven heating technology provide the greatest performance and flexibility. Summit II features a smaller footprint, yet larger board capacity with easy to adjust board support fixtures. Enhanced SierraMate software takes the popular user-friendly operation to the next level with a simple icon driven GUI and unmatched flexibility through easily customized operation sequences.

With the XQuik II with AccuCount Technology, maintaining inventory control of component reels has never been faster or easier. The XQuik with AccuCount system automatically counts components as small as 01005 with better than 99 percent accuracy. The process takes only seconds, compared to many minutes required by typical counting processes. The new XQuik II handles reels from 7 to 15".
